**OPTIONS TO ENSURE ADEQUATE SUPPLY OF PETROLEUM
PRODUCTS**

Minister of Energy and Mining James Robertson, representatives from Petrojam and the Port Authority of Jamaica this morning sought to reassure the Jamaican public that the damage to the dock would not disrupt the supply of petrol in the island.

To ensure adequate supply, the following options are being pursued to keep the nation supplied with petroleum products during this time.

1. Completion of two pipelines to the former “Esso Kingston Terminal”. The pipelines will be used for LPG and Automotive Diesel oil /heavy fuel oil
2. Importing products into Petrojam Limited Montego Bay Terminal
3. Using floating hoses to deliver Gasoline, Jet Fuel and Automotive Diesel Oil from ship to shore.
4. Conversion of the damaged docks to a Single Point Mooring System.

5. Exploring the use of other companies storage and dock facilities.
